Stop-Over at Ithaca

Lehigh Valley Service enables Cornellians to stop-over at Ithaca without loss of business time when enroute between New York or Philadelphia and Buffalo, Niagara Falls, Detroit and Chicago.

Why not take advantage of this on your next trip. Just tell the Conductor and deposit your ticket with the ticket agent at Ithaca.

CORNELL ALUMNI NEWS

VOL. XXVII, No. 3

ITHACA, N. Y., OCTOBER 9, 1924

PRICE 12 CENTS

ORGANIZATION meetings of various Campus societies, and the opening of competitions for everything from publications to athletics, music, and fraternity members occupy most of the spare time of undergraduates, with instruction settling down in earnest for the rest.

TWELVE GERMAN students arrived in New York early in September to study under fellowships at as many American universities, of which Cornell is one. These fellowships were established through the International Institute of Education, in the interests of which Dean Albert R. Mann '04 of the College of Agriculture is now in Europe. President Farrand is a member of the American Board of the Institute, which is shortly to select twelve American students for reciprocal fellowships in Germany.

DRAFTING rooms in East Sibley have been redecorated and new desks and lighting fixtures have been installed during the summer, and the freshman laboratory of the College of Engineering has been remodeled and has received a new concrete floor.

J. A. C. FAGGINGER AUER, Ph.D. '24 minister of the First Unitarian Church of Ithaca for the past seven years, has left to become professor of the philosophy and history of religion at Tufts Divinity School at Somerville, Massachusetts. He is to be succeeded, beginning in November, by the Rev. John Lewis, until recently minister of the Weaste Congregational Church in Manchester, England.

THE COST of living in Ithaca received another boost on September 24 when the master barbers of the city announced that henceforth the price of shaves would increase from twenty to twenty-five cents. A standard rate of one dollar was set as the price of bobbing long hair.

CHARLES G. BULLIS '08, of Los Angeles, was in Ithaca recently to confer with Harold Flack '12 of the Cornellian Council, Foster M. Coffin '12, Alumni Representative, and President Farrand relative to the affairs of the Cornell Club of Southern California. Bullis has been elected secretary of the Club to succeed Henry M. Robinson '90, who has returned to Paris to complete his work as a member of the Dawes Committee on Reparations.

THE WOODEN SHACK just north of the southern line of Ithaca on Spencer Street, which marks the beginning of the local salt industry, is now nearly covered in the process of grading for a new road. On this site in 1887 the Ithaca Test Well Company sank a drill for natural gas, which was

never found in commercial quantity. A vein of salt was located, however, which led to the present industry north of the city, and the well for many years furnished in addition an excellent mineral water.

CHARLES E. CURTIS '85, superintendent of buildings and grounds at the University, was married on September 20 to Mrs. Gertrude Kellogg Parsons of Wilkes-Barre, Pennsylvania.

PATRICK WALL, for many years a prominent shoe merchant on North Aurora Street, who at one time enjoyed quite a vogue among undergraduates as the seller of "The Ugliest Shoe in Town," died on September 25, aged eighty-one.

RICHARD C. YATES '24 of Buffalo, last year's manager of crew, has presented the Athletic Association with two large-dial stop watches which he procured in France this summer. These are to be strapped to the chests of coxswains during races so that the stroke may judge of his speed by the elapsed time. The Athletic Association has been trying for some time to get such instruments, which cannot be bought in the United States.

CHEERLEADERS named by the Athletic Council last June took up their duties at the St. Bonaventure game. They are Henry C. Givan, Jr., '25 of Nashville, Tennessee, head cheerleader; and Newton C. Burnett '25 of Waban, Massachusetts; Robert G. Evans '25 of New York, James C. Johnson '25 of Milwaukee, Wisconsin; Sidney W. Little '26 of Buffalo; and Wendell K. Webber '25 of Pearl River.

CORNELL is announced as one of the seven institutions which have asked that the International Institute of Cooperation, formed in Cleveland during August by representatives of agricultural cooperative organizations, be located with them.

SEVERAL CORNELLIANS were among the fifty college students who took summer training in railroading by performing the work of track walkers for the Delaware and Hudson Railroad at South Schemectady during the summer.

ONE FRESHMAN this year, Miss Harriet Lang of Long Island, was the winner of four different scholarships.

THE SAGE CHAPEL Preacher for October 12 will be the Rev. Dr. Clarence A. Barbour, Baptist, president of the Rochester Theological Seminary.

DR. VERNON H. BLACKMAN, professor of plant physiology in the Imperial University of Science at London, was a visitor at Cornell over the week-end. He spoke at the College of Agriculture on Friday evening and was taken to visit Enfield

Glen and the biological preserves near McLean. He was the guest of Professor Herbert H. Whetzel '04.

THE BOARD of Public Works of Ithaca on September 24 decided to investigate the storage of the city's water supply above the dam in Six Mile Creek, which in the twelve years since the dam was erected has filled in so as to decrease materially the amount of water that may be impounded.

MILLARD W. BALDWIN, JR., '25 of Marcy has been appointed University chime-master for the year. He was assistant to last year's chime-master, Charles N. Strong '24, of Ithaca, who is now registered in the Graduate School, and will divide with him the rendition of the "Jenny McGraw Rag" and the other favorites.

THE BRITISH-AMERICAN CLUB entertained the members of the Cambridge debating team at a smoker in Barnes Hall on October 6. The visitors included Richard Austin Butler, an authority on modern languages and a Conservative in politics, A. P. Marshal, a Liberal and an athlete, and Gerald Sparrow, a Tory-Conservative, lawyer, and journalist.

M. DARRIEULAT, the new fencing coach, has issued a call for varsity material, and is holding practice daily in the fencing room of the Drill Hall. Coach Darrieulat has expressed the hope that Cornell women as well as men will become interested in the sport.

DR. J. E. WILLIAMS, vice-president of Nankin University, visited Cornell on October 1 to talk over the progress of Cornell-in-China and to extend invitations to several members of the Faculty to spend their sabbatic leaves as exchange professors at Nankin.

THE FIRST ORGAN RECITAL of the new term was given by Professor Harold D. Smith, University organist, in Bailey Hall on October 3. They are to be given once a week at five o'clock on Friday afternoons, alternating between Bailey Hall and Sage Chapel.

MISS FLORENCE J. BAKER, for several years writer of the "Alumni Notes" and assistant editor of the ALUMNI NEWS, on September 27 was married at her home in Ithaca to Charles N. Abbey '24. They will live in Albion, where Abbey is assistant county agricultural agent.

EIGHTY-FOUR persons have so far registered for the University Band, which will make its first public appearance at the Williams game on October 11, for the dedication of the Cornell Crescent. This is a larger organization than for some years.

Registration More This Year

More Former Students In University and Fewer Freshmen Than Last Fall—Some Colleges Increase

The total number of students registered in the University at Ithaca at noon on September 27, the last regular registration day, was 4,932, nineteen more than the number registered at the same hour last year.

The entering class is smaller than last year. The number of new students is 1,414 as compared with an enrollment of 1,513 new students at the same hour last year, or 99 fewer.

In the number of old students registered there is an increase of 118 over the figures of a year ago, there being 3,518 now as compared with 3,400 then.

The reduction in the size of the entering class this year is the result of the University's effort to keep the numbers within bounds. Some of the colleges enforced the rule requiring applications for admission to be filed before August 1, and rejected applications received after that day. In the College of Arts and Sciences the number of new students is 89 less than last year, while the old students are 95 more in number. There are now 1,810 students in Arts and Sciences as compared with 1,804 at this time last year. The College of Engineering this year admitted to the freshman class only those applicants who were able to meet the regular entrance requirements in full, and as a result the number of freshmen in Engineering is about thirty less than it was last year, while the other classes in that College are somewhat larger. On the other hand, the College of Law reports an increase of about fifty in the number of its students, of which increase about thirty are in the first-year class.

HOME-COMING NOVEMBER 1

Saturday, November 1, the date of the Columbia-Cornell football game, will be the occasion of the annual home-coming of the increasing number of alumni who make at least one pilgrimage to Ithaca each fall. Particular interest attaches to the celebration this year in that to most of the old grads it will present the first opportunity to see in operation the Cornell Crescent, the new development on Schoellkopf Field.

In accordance with the custom of other years, there will be no special ceremonies to mark Home-Coming Day, although several organizations will hold meetings. The Cornell Law Association will be addressed in an open meeting in Boardman A at eleven o'clock by Silas H. Strawn, Esq., former president of the Illinois State Bar Association and of the Chicago Bar Association, and chairman of the Council on Legal Education of the American Bar Association. An informal smoker for the alumni, friends, and students of

the Law College is also planned for the evening.

The Cornellian Council executive committee will meet in Morrill Hall, as will representatives of the classes which are scheduled for reunions next June.

Luncheon for the alumni and Faculty, at fifty cents, will be served by the University.

SPORT STUFF

Football would be a great game to watch if the other spectators were not so excessively emotional. I like to watch a football game coldly and critically. I like to be surrounded by a small group of kindred spirits, who speak no word save now and then to hazard a guess as to the type of play the offense will next select. I like to see a snappy forward pass connect, but why should I have my head nearly knocked off by a passionate partisan in my rear whenever that happens?

In its way football is as perfect a thing as a symphony played by a great orchestra. It should be approached in that spirit. When a great wave of harmony bursts dramatically from the orchestra, folks in front don't stand up and yell "Yea-boy", do they? No. And the man behind doesn't smack you on the back with a two pound program, does he? Again no. Then why should he do it at a football game? I ask you.

On and after this date we propose to mix soothing anodynes with the peanuts and opiates with the soda pop. Then, with two-thirds of the spectators and all of the cheerleaders slumbering peacefully through the second half the rest of us can settle down and really enjoy a football game.

R. B.

A RECORDING-BREAKING rain for the month of September in Ithaca, set in early the morning of September 29 and in nearly forty-eight hours brought a total of 4.47 inches. Creeks overflowed the flats, a clogged flume in Fall Creek brought a flood over Lake Street well up the Hill, and Ithaca Falls were swollen to scenic glory.

A FORD car loaded with crates of potatoes, left in front of the Acacia House on East Buffalo Street by R. C. Brill '28 of Brookton, on September 27 dashed madly down the hill and ended by colliding with another car owned by Charles W. Stillwell '22 and parked at the foot.

BETA SIGMA RHO has bought the house at 126 Westbourne Lane lately owned by Jerome A. Fried '19, it was announced on September 30. The three-story brick residence was sold to Fried several years ago by the late Professor Waterman T. Hewitt, Ph.D. '79. Professor Christian Midjo of the College of Architecture has drawn plans for developing the property.

Convention to Elect Directors

Nominations for Corporation Board Due in Ithaca October 15—Dartmouth President to Speak

One of the most interesting features of the general alumni convention, to be held in New York under the auspices of the Cornell Alumni Corporation, on November 14 and 15, will be the election of directors of the Corporation from the twelve districts into which the Cornell world has been divided. The local clubs, and groups of twenty or more alumni who are not members of any club, will present nominations of Cornell men and women who are residents of the districts for which they are named. The convention will vote on these candidates. Last year at the Buffalo convention twenty-nine alumni were in the field for the twelve places, of whom the following were successful:

Central New York, John Wilkinson '89; Metropolitan New York, Dr. Mary M. Crawford '44; Eastern New York, Dr. Walter H. McNeill, Jr. '10; Western New York, Walter P. Cooke '91; New England, Archie C. Burnett '9; Middle Atlantic, Andrew J. Whinery '10; Keystone, Joseph N. Pew, Jr. '08; Southern, Dr. Frederick V. Coville '87; Great Lakes, George B. Walbridge '00; Central, Edwin E. Sheridan '11; Western, Edward E. Soule '88; Pacific, Wilson D. Clark '08.

Nominations for district directors must be filed with Foster M. Coffin '12, secretary of the Corporation, 31 Morrill Hall, and postmarked not later than October 15. The by-laws call for nominations thirty days prior to the convention.

The twelve district directors elected next month in New York will thereupon complete the Board to its full quota of fifteen by the election of three directors-at-large. On the present Board those three directors are Mrs. Harriet Tilden Moody '76, Walter C. Teagle '00, and Julian A. Pollak '07.

Dartmouth President to Speak

The Committee of the New York Clubs and the officers of the Cornell Alumni Corporation have not yet announced the complete program for the two days at the Hotel Roosevelt. The assurance is that at the dinner Friday night two of the speakers will be the Presidents of the two colleges which will meet on the football field at the Polo Grounds Saturday afternoon: Drs. Hopkins of Dartmouth and Farrand of Cornell.

The annual golf tournament of the Cornell Club of New York will be held on the day preceding the formal opening of the convention. Visiting Cornell men are invited to participate.

LEHIGH'S RESEARCH INSTITUTE

The announcement has just been made of the launching of the Lehigh Institute of Research by the administration of Lehigh University. The management of

the new organization, which was authorized by the Board of Trustees on April 25, 1924, is vested in a Board of Directors composed of thirteen members of the staff, including President Charles Russ Richards '95. Each man is a recognized authority in his special field.

The object is "to encourage and promote scientific research and scholarly achievement in every division of learning represented in the organization of the University; and in recognition of the need for further and more exact knowledge in science and in the applications of science to the affairs of modern life. It is believed that this organization will be helpful in stimulating interest in liberal and professional education; and that it will prove to be of value to the professions and industries of the nation."

The Lehigh Institute of Research will afford training in research methods to the following classes of individuals: the members of the teaching staff of the University; the members of the scientific staff of the Institute, including research fellows, research assistants and research professors appointed by the University and paid by it from its own funds or from funds for the purpose supplied by an individual, a firm, or a corporation; graduate students in the University; special investigators temporarily employed for work on a particular investigation.

"The modern University is dedicated to research as well as to teaching," says the announcement. "It must render to society the fruits of its scientific inquiries; and to its students it should promise instruction by scholars. Research is the tool of the scholar, and is fundamental to the work of the teacher, who, to exercise the greatest possible influence in this field, must be devoted to the advancement as well as the dissemination of knowledge. The joy and the personal stimulus to the teacher, which come from creative work, generally promote his success in the class room or laboratory, for his teaching inspires confidence and enthusiasm in proportion to his standing and prestige among men of his kind. Furthermore, since a university is an instrumentality to promote the work of scholars engaged in teaching and research, its standing is determined only by that of its component parts; if these are leaders and the creators of leaders, so is it recognized as a leader."

To preserve the records of its investigations and to render them available to every one interested, the Institute will publish and distribute from time to time bulletins presenting the results of investigations conducted by or under its direction; and to issue other material which may be helpful to the various interests which the Institute seeks to serve. Under certain conditions, and with the approval of the Executive Board, reports of such investigations may be presented before professional or other learned societies and published by them.

ATHLETICS

The Football Schedule

Cornell 56, St. Bonaventure 0.
 Cornell 27, Niagara 0.
 October 11—Williams at Ithaca.
 October 18—Rutgers at Ithaca.
 November 1—Columbia at Ithaca.
 November 8—Susquehanna at Ithaca.
 November 15—Dartmouth at New York.
 November 27—Pennsylvania at Philadelphia.

Rowing Practice Starts

Fall rowing practice was inaugurated Saturday by direction of Coach Charles A. Lueder '02, after he had given the rowing

COACH CHARLES A. LUEDER '03

squad a week's drill on the machines in the crew room. Some two hundred candidates have enrolled for crew, more than half of them freshmen. Coach Lueder hopes to have several combinations on Courtney Inlet every day as long as weather permits.

The varsity squad includes six of the men who rowed at Poughkeepsie last June and a number of others of some experience, as well as the members of the last year's freshman eight.

"I am going to coach as Courtney did," said Lueder in discussing his policies. "I don't know any other way and moreover I don't want to know any other." The new coach is modifying the stroke in vogue here in recent years so as to make it conform to the Courtney style. "These boys are going to work," he said, and on Saturday, instead of going to the football game, they rowed.

Coach Lueder is giving special attention to coxswains. He regards properly trained coxswains as essential, and he hopes to have one or two old varsity coxswains back to help him this fall.

Team Defeats Niagara 27-0

The football team didn't look so good Saturday. A fighting Niagara team, more alert and aggressive than the opponent of the Saturday before, was defeated by a score of 27 to 0 in four short periods of ten minutes each, but five times Cornell was held for downs on or inside the twenty-yard line. This lagging by the offense was especially noticeable in the second period, when the team failed to score. The momentum fell off also in the first part of the first period and just toward the end of the game.

Cornell scored the first touchdown after about five minutes of play, and after a penalty for offside play had cost Niagara a touchdown. A bad pass to Hokelman about midfield resulted in a loose ball; Schrieber picked it up and ran down the field over the Cornell goal line. Linesman Maxwell had caught the visitors offside however and the ball was brought back and Cornell put it in play. From midfield the team then swept down the field in a series of off-tackle runs and line plunges, Isaly, Hokelman, and Whetstone doing most of the work, until Whetstone crashed through left guard for a touchdown, and he made the extra point by kicking a goal from placement.

In the second period Cornell was held for downs on the 15-yard line, after twenty yards of rushing. A poor punt by Hecker gave Cornell another opportunity from the twenty-four-yard line, but again Niagara took the ball away on downs, on the fifteen-yard mark. Early in the third period the lively visitors took the ball away again, on their twenty-two-yard line, but on the next punt Cornell launched a determined drive that went all the way down the field, Whetstone's twenty-yard run through right tackle and a ten-yard dash through left tackle by Isaly making most of the ground. Wade went over on a two-yard drive through center and Whetstone kicked another placement goal.

Two more touchdowns were scored in the final period, when the team did its best work of the day. Fresh backs were sent in by Coach Dobie and the visitors seldom stopped the drive. Wester was substituted for Isaly, Friend for Wade, while later in the game Rosenberg went in for Hokelman and Robbins for Whetstone. A few changes were made also in the line. Wester celebrated his debut by ripping off a twenty-yard again, the first of several nice runs, while Friend found holes in the lines for good gains. He made two touchdowns in this period and one of them was converted into a goal. Just before the final whistle, Wester took the ball to the eight-yard line, but the punch faded away again and a forward pass on the fourth down failed.

The team lined up a little differently from the line-up against St. Bonaventure. Captain Henderson was in his regular position at left end; Whitney had a chance at right tackle in place of Hill; and Evans,

of last year's freshman team, also received a chance in that position in the last quarter. Hokelman started at right half, instead of Tilton, and Isaly started the game, Wester not going in until the final quarter.

The team seemed to be better together; there were times when the interference for the off tackle play formed with old time precision; but even conceding that opposition was stiffer and the period of play twenty minutes shorter than usual, the team as a whole did not seem to have made much progress. No such backfield interference as that afforded the runners for the past three seasons has yet been developed, and the lagging in the offense at times was disquieting. Tackling was effective and Whetstone's punting satisfactory. On two occasions, the kick-off went over the line, giving Niagara an opportunity of putting the ball in play on the twenty-yard line. The line-up and summary:

Cornell (27)		Niagara (0)
Henderson.....	L.E.....	Gorman
Kearney.....	L.T.....	Nies
Morris.....	L.G.....	Kiely
Affeld.....	C.....	Quigley
Trousdell.....	R.G.....	Ivers
Whitney.....	R.T.....	Stanley
Kneen.....	R.E.....	Moran
Isaly.....	Q.B.....	Hecker
Wade.....	L.H.B.....	Bolley
Hokelman.....	R.H.B.....	Hatch
Whetstone.....	F.B.....	Schrieber

Score by periods:

Cornell.....	7	0	7	13
Niagara.....	0	0	0	0

Touchdowns: Cornell, Whetstone, Wade Friend 2. Points after touchdown: Whetstone 3. Substitutions: Cornell, Wester for Wade, Munns for Trousdell, Friend for Isaly, Evans for Whitney, Rosenberg for Hokelman, Aird for Kearney, Robbins for Whetstone, Anderson for Morris, Brigden for Kneen; Niagara, Kelly for Stanley, Powman for Polley, Bierling for Bowman, Powman for Bierling, Bierling for Hatch, Smith for Kiely, Stanley for Kelly, Roach for Stanley.

Referee: F. W. Carson, Penn State. Umpire: D. W. Merriman, Geneva. Linesman: A. G. Maxwell, Brown. Field Judge: J. A. Evans, Williams. Time of periods: ten minutes each.

Opponents Look Good

After a lapse of four years, Cornell resumes football relations with Rutgers in a game in Ithaca on October 18. The last time the teams played was October 30, 1920, Cornell winning 24 to 0. Rutgers this year plays the date given to Colgate in recent years.

George Foster Sanford is not coaching Rutgers this year. He finally retired at the close of last year and Frank Wallace, captain of the 1920 Rutgers team, was chosen head coach. He has three assistants. Rutgers has played and won two games so far, defeating Villanova in the opening contest by a score of 14 to 0, and Lebanon Valley last Saturday by a score of 56 to 0.

Rutgers has some players of promise, among them Hazel, fullback, who won attention last year as a defensive end; Benker, a veteran halfback; Captain E. C.

Brennan, a 195-pound center; Lincoln, an experienced guard, and Gibson and Bender, experienced tackles.

Judged by the showing of some of Cornell's principal opponents "soft" schedule talk this year seems foolish.

Columbia, which Cornell plays here November 1, opened the season by defeating Haverford 29 to 3, and followed this up last Saturday by walloping Eddie Kaw's St. Lawrence outfit, 52 to 0. Dartmouth blasted Norwich in the opening game, 40 to 0, and rolled up an even bigger score Saturday, defeating McGill, 52 to 0. Pennsylvania won a handsome victory over Ursinus, 34 to 0, in the opening game, and followed this up Saturday by defeating Franklin and Marshall, 26 to 0.

Williams, which plays here Saturday, defeated Hamilton 27 to 7 in the opening game and on Saturday won over Bowdoin, 19 to 0.

CLUB ACTIVITIES

Northern New Jersey

The Cornell Club of Northern New Jersey, at a meeting held on September 19, elected Herman B. Van Cleve '17 as president to succeed Sanford B. Hunt '04, who resigned on account of illness.

The Club has nominated Andrew J. Whinery '10 of Newark, for re-election as director of the Cornell Alumni Corporation from the Sixth District.

South Carolina

All Cornellians in South Carolina and adjoining States are invited to join with the Cornell Club of South Carolina at its second annual dinner in the Rathskellar Room at the Jefferson Hotel, Columbia, South Carolina, Wednesday evening, October 22, at seven p. m. The Club will have a reserved box at the Clemson—University of South Carolina football game at the State Fair the next day.

Binghamton

The Cornell Club of Binghamton held its annual send-off meeting for the members of the Freshman Class from that city, on September 22. Fifty members of the Club joined with the youngsters in the Y. W. C. A. Building. Professor Eugene P. Andrews '95 came from Ithaca to make the principal address. Other talks were given by Rev. Arthur B. McCormick, minister of the West Presbyterian Church, who, although not a graduate of Cornell, described himself as an alumnus once removed, since his daughter, Martha, received her degree at Cornell last June. Maynard C. (Bob) Hammond '19, Karl M. Sayles '21, and Frederick W. (Ted) Medlong '18, constituted an impromptu trio which provided the musical entertainment.

New York Women

The annual meeting of the Cornell Women's Club of New York was held on September 27. About seventy-five were

present. The program centered around reports of the reunions in Ithaca last June. Members of a number of classes holding reunions at that time reported, and reports were also presented of the meeting of the Federation of Cornell Women's Clubs and the Cornell Alumni Corporation.

Great enthusiasm was manifest regarding the Convention in November and plans for the entertainment of the women, who it is hoped will attend, were discussed. The Club was also authorized to appoint a committee to begin the formulation of plans for a permanent club home of its own.

The officers elected for two years were: president, Katherine R. Buckley '01; corresponding secretary (one year), Mrs. Herbert D. Williams (Nina Van Dyne) '10; treasurer, Lillian C. Dunn '03; directors, Alice H. Bruere '95 and Eva M. Haigh '14. Dorothy Winner '16, vice-president, Frances G. Selden '10, recording secretary, and Marion Dean '21, director, hold office for another year.

Pittsburgh

Pennsylvania and Cornell had their Annual "Gol-uf" Match on September 22 at the Pittsburgh Field Club. In spite of the bad weather in the morning, about twenty-five turned out for each side and went the rounds, valiantly trying to do or die for Alma Mater. Cornell succeeded in dying, beaten by the thrilling score of 2,338 to 2,413.

As this was the deciding match, Pennsylvania won the cup by three matches to two. Immediately, Pennsylvania discovered that the cup had two sides; so they said they would engrave their name on one side for posterity to gaze upon and put up the other side again for the best three out of five matches. Accordingly, the cup will be buffeted about for five more years. After the match, all sat down to dinner where the contestants patted each other on the back and exchanged alibis generally.

The luncheons at the William Penn Hotel every Friday noon have been kept up all summer with marked success. Plans are under way to send a large delegation to New York for the Convention on November 14 and 15.

Rochester

The Cornell Club of Rochester held its annual fall outing on September 27 at Caledonia. All Cornell men of Western New York were invited to the Spring Brook Inn, on the grounds of the State Fish Hatcheries.

J. Emmett O'Brien '15 was chairman of the committee on arrangements. Frederick J. Weismiller, director of physical education of the Rochester Y. M. C. A., was in charge of a sports program that included a baseball race, an equilibrium race, a Klondike gold rush, quoits matches, and a tug of war. A clambake was served in the late afternoon.

Dr. Luzerne Coville '86, president of the Cornell Club of Ithaca, spoke before the Rochester club at the regular luncheon at the Powers Hotel on September 24. Dr.

Coville's subject was "The New York State Indians," and he gave color to his address by appearing in an exact duplicate of the Iroquoian costume worn by Captain Joseph Brant at Fort Niagara in 1798. It consisted of blue trousers, green jacket, moccasins, and a headdress of deerskin and eagle's feathers. On his shoulders were silver epaulets similar to those worn by Captain Brant when an officer in the British Army. Wrapped about him was a red and blue blanket and he carried in his hand the tomahawk and pipe of peace, from which hung a number of eagle feathers.

New England

In the following letter to Cornell men of Boston and vicinity, President Burnett and Secretary Auerbach of the Cornell Club of New England point out the advantages of the weekly luncheons. It is printed in full as suggesting to other clubs a simple way to solve the problem of making luncheons agreeable both to the hearty plutocratic diner and to the young man who for one reason or another is restricting his diet.

FELLOW CORNELLIAN:

The weekly luncheons of the Cornell Club of New England have been held regularly all summer, as there were a few of the fellows who were in town and who wished to get together every Monday as usual. The attendance, of course, was necessarily small in the hot weather, many of the men being away on vacations.

New that you are all back again, we should very much like to see as many of you as possible at the Hotel Essex at 12.30 every Monday. The re-canvass for alumni funds is over, and we can once more all eat our luncheons in peace and comfort without fear of being touched for a subscription.

Also, remember that under the new arrangement you can order as little or as much as you like and pay accordingly. If you want the regular table d'hôte luncheon at \$1, with a dime for the waiter, you will get a bountiful repast. If, on the other hand, you want a plate of soup, it will cost you only 20 cents. Therefore, you have a choice of whatever you wish, at a price that is bound to suit you. It will cost you no more to have luncheon with Cornellians at the Essex, amongst congenial companions, and go away happy, than to climb on to a stool at Thompson's and leave with a grouch.

Attending the luncheons is largely a matter of habit, and if you get the habit you'll be happy. Don't hesitate to bring a friend along at any time, although he may not be a Cornellian. The friends of Cornellians are welcome at our weekly luncheons.

We hope now and then, a little later, to have some interesting speakers, perhaps once a month, when a special announcement will be sent out.

Put down on your calendar now, and keep the dates open, Friday and Saturday, November 14 and 15, when the fifth Alumni Convention of the Cornell Alumni Corporation will be held in New York, and also the Cornell-Dartmouth football game at the Polo Grounds, Saturday afternoon, November 15. You can kill two birds with one stone by attending the Convention and football game.

LITERARY REVIEW

A Great French Thinker

The Philosophy of Emile Boutroux as Representative of French Idealism in the Nineteenth Century. By Lucy Shepard Crawford, A.B. '13, Ph.D. '23, Professor of Philosophy in Sweet Briar College. New York. Longmans, Green & Co. 1924. 25 cm., pp. viii, 153. Cornell Studies in Philosophy 16.

This is a careful, intelligent, and comprehensive study of one of the greatest of modern French thinkers.

For the proper purpose of securing a suitable background Dr. Crawford devotes about two-fifths of her work to the earlier French philosophy—Condillac and sensationalism, Maine de Biran, and the Eclectics Cousin, Jouffroy, and Royer-Collard and their opponents Comte, Ravaisson, Renouvier, and Jules Lachelier.

Descartes (1596-1650) has been called the Founder of the Modern Spirit, and his system the beginning of modern science. For the apostles of Reason in the eighteenth century it was but a step from the Cartesian dualism, or belief in a soul separate from the body, to the mechanistic theory of the Encyclopedists, that all phenomena are explainable on a materialistic or cause-and-effect basis. Belief in God became decadent. Condillac (1715-1780) was the first of the Sensationalists, who held that sensation is the basis of all consciousness. Condillac imagined an animated immovable statue endowed gradually and one by one with the use of the senses. The thought of Comte, (1798-1857), the founder of positivism, was characterized by a desire to raise the masses to a higher level of cultural life, and on the other hand by great confidence in the power of the scientific method to achieve this end. Reason and Humanity were his watchwords. Maine de Biran, a disciple of Condillac, broke away from the materialism of the previous century and inaugurated a new era in French philosophy, championing the life and power of the free human spirit, insisting upon the supremacy of reason and free will, and thus becoming the founder of modern French idealism.

Of this idealism Emile Boutroux (1845-1921) was in his generation, likewise, a great exponent. In his doctor's thesis of 1874 we find him protesting against the dogmatism of science. He devoted his life to the task of restoring the religious spirit to its rightful place while at the same time maintaining the integrity of the scientific spirit. His challenge to science is expressed in three points: (1) Science must accept existent realities as already given. Which came first, the chicken or the egg? Given the one or the other, science can proceed, but without that beginning there can be no science. (2) Science presupposes an ordered universe,

regulated by immutable natural laws. But why human experience is what it is, science cannot explain. Here chance reigns. (3) Science assumes that new phenomena are being constantly produced in the world; but all the scientist can do is to relate the new to the already known and to try to reduce the changing to the immutable. Science, then, is fallible; a far more certain source of knowledge is the higher reason.

About God Boutroux is very sure; likewise about the importance of the religious life. Faith, love, or enthusiasm, and an ideal—these are the spiritual sources of human action. The spirit of religion is mighty because it proceeds "from a faith stronger than knowledge; from a conviction that God is with us, more effectual than all human aid; from a love stronger than all arguments."

Boutroux is, then, a significant figure; and this illuminating treatise appears to do justice to his thought.

Books and Magazine Articles

"A First Book in American History" by Charles A. Beard, Ph.D. '00, and Professor William C. Bagley, Ph.D. '00, of Teachers College, has just appeared in a revised edition from the press of the Macmillan Company. There are 489 pages, 32 maps, and 115 illustrations. It sells for \$1.

In *School and Society* for June 28 Clinton S. Marsh '91, dean of the Evening Session of the University of Buffalo, discusses "Credit for Evening Work."

In *The Cornell Countryman* for June Professor E. Lawrence Palmer '11 writes on "In the Heavens Above or On the Earth Beneath," comparing the literature available for farm children in his boyhood with that now available. Charles K. Powell, Grad., discusses "The Outlook on Eggs." Professor Thomas J. McInerney '10 writes on "The Importance of the City Milk Inspector's Work to the Milk Producer."

In *The Pulp and Paper Magazine* for May 1, Professor Ralph S. Hosmer writes on "The Extent to Which Silviculture is Practicable Under Present Conditions." The article is concluded in the subsequent issue. The address here printed was delivered at a recent meeting of the Canadian Society of Forest Engineers.

"Won by a Nose" by James French Dorrance '03 was syndicated as a serial in several newspapers, including the *Syracuse Post-Standard*, in July.

"Camping and Woodcraft" by Horace S. Kephart, '81-4 Grad., has been reissued by the Macmillans in a one-volume edition containing 479 pages and 192 illustrations. The price is \$2.50.

A new and revised edition of "Animal Husbandry for Schools" by Professor Merritt W. Harper of the College of Agriculture has been issued by the Macmillans. It contains 624 pages and 241 figures, and sells for \$2.40.

Published for the alumni of Cornell University by the Cornell Alumni News Publishing Company, Incorporated.

Published weekly during the college year and monthly in July and August; forty issues annually. Issue No. 1 is published the last Thursday of September. Weekly publication (numbered consecutively) ends the last week in June. Issue No. 40 is published in August and is followed by an index of the entire volume, which will be mailed on request.

Subscription price \$4.00 a year, payable in advance. Foreign postage 40 cents a year extra. Single copies twelve cents each.

Should a subscriber desire to discontinue his subscription a notice to that effect should be sent in before its expiration. Otherwise it is assumed that a continuance of the subscription is desired.

Checks, drafts, and orders should be made payable to the Cornell Alumni News.

Correspondence should be addressed:

A PUBLIC SERVICE

SPEAKING at the Detroit meeting of the Associated Harvard Clubs in June, President Lowell said: "People often speak as if a democracy had no need of traditions. My own belief is that a democracy has more need of traditions than any other form of government. Democracy is the most difficult form of government, because it requires the most widespread intelligence, the most widespread use of the experiences of the past in determining the problems of the present. Therefore it is, I believe, that more than any other country, perhaps, in the world, has America need of its universities, for they are the reservoirs of knowledge and the eternal springs of truth."

The same thought underlies the recent action of the Scottish Rite Masons in establishing a number of scholarships for pupils in American universities. The incumbents are not to be trammelled in their search for the truth; but having sought for and found some measure of truth, they will undoubtedly become for this very reason the sternest foes of muddy civic thinking and of proposals making for undemocratic government.

Looked at from this point of view alone, the action of the Class of '99 at its last reunion in subscribing a large sum of money to the University treasury is to be regarded as the finest kind of public service. Every dollar of this money will tell in the future in better trained minds, in saner thinking, in a keener desire on the

part of future generations for a better, sounder, more honest public life.

The subscription, moreover, is especially opportune just now when the University authorities are perplexed by so many acute financial problems—the need of better professorial salaries, the probability of an annual deficit, the addition to the Library and the like. Of course the money of the '99ers may not go very far toward the solution of all these problems; but the important point is that one class has undertaken this service without pressure, without solicitation. Its example may well be and undoubtedly will be followed by the twenty-five year reunion classes, as is now the custom in several of our Eastern universities.

CORNELLIANS AT RENSSELAER

President Farrand and Dean Dexter S. Kimball were the formal delegates from Cornell University at the centennial celebration of Rensselaer Polytechnic Institute at Troy on October 3 and 4. Rensselaer is the oldest school of science and engineering in any English-speaking country; it introduced field work and laboratory practice into the United States, and was a pioneer in agricultural education and graduate study.

The President appeared on the program with Herbert Hoover and the presidents of engineering societies of Great Britain, France, Italy, Mexico, and Canada. The exercises were opened Friday morning with an invocation by Dr. G. Ashton Oldham '02, Bishop Coadjutor of the Diocese of Albany, and in the afternoon Sao-Ke Alfred Sze '01, Envoy Extraordinary and Minister Plenipotentiary from China to the United States, made the dedicatory address at the unveiling of a tablet in memory of Dr. Samuel Wells Williams.

Included among the delegates were Professor Paul M. Lincoln, director of the School of Electrical Engineering, who, as a past president, was one of the representatives of the American Institute of Electrical Engineering. Walter Rautenstrauch, of the Graduate School, represented the University of Missouri, and George F. Zook, Ph.D. '14 represented the United States Bureau of Education. Edwin N. Sanderson '87, who also holds a degree from Rensselaer, was delegate from the Rensselaer Club of New York. Dr. Farrand was one of four college presidents who were awarded the honorary degree of Ph.D. The other men honored were Presidents Angell of Yale, Birge of Wisconsin, and Stratton of the Massachusetts Institute of Technology.

SEASON TICKETS are being sold this year for all debates to be held in Ithaca, the first of which was on October 6 with Cambridge University. The team for this first meeting consisted of Ross E. Scanlan '24 of Buffalo, John W. MacDonald '25, of Watervliet, and Samuel Mezansky '25 of Poughkeepsie.

OBITUARY

James C. Kennedy '79

James Carroll Kennedy, one of the best known civil and mining engineers in the West, died on May 17 last at Sacramento, Calif., after a short illness of pneumonia.

He was born on July 24, 1851 at Troy, Vt., but he came to Cornell from Saratoga, Wyo., as a student of civil engineering. He was graduated in 1879 with the degree of B. C. E. He was a member of the Philathea Society and an editor of *The Cornell Review*.

After graduation, he took a mining engineering course at Columbia, but left five months before completing his course for a railroad job in the West. For several years he was engaged chiefly in reconnaissance and location surveys as well as resident engineer on construction of the Atchison, Topeka and Santa Fe, the Denver and Rio Grande, Colorado Midland, and Chicago, Burlington and Quincy Railroads.

During his earlier years in the West he was also the engineer on location and construction of large canals in Colorado, New Mexico, and Wyoming and also scout for irrigation companies investigating feasible sites for irrigation enterprises.

He was deputy State engineer in Colorado under three administrations and several times served as a surveyor in Colorado, Wyoming, and Nevada. For about fifteen years he was also engaged in mining engineering. In 1919 he became supervising commissioner for distribution of water in the Walker River area under a decree of the United States District Court and later served as city engineer in Yerington, Nev. His last position was assistant engineer in the office of the county engineer of Sacramento County, Calif.

He is survived by a sister, Mrs. Mary K. Bosworth-Smith '93, of New York, who was the first woman to graduate from the Law School.

Dr. Merton O. Phillips '91

Dr. Merton Ogden Phillips was found dead in bed in St. Paul, Minn., on September 22. Several years before he had suffered a stroke of paralysis and it is believed that his death was due to a recurrence of the disease.

He was born at Hessville, Ohio, on June 25, 1868, the son of Dr. O. E. and Addie Phillips. When he was thirteen old, his parents moved to Fremont, Ohio, where he secured his early education and won notice for his scholastic ability. After attending the Kenyon Military School for one year, he entered Cornell in 1887 as a student in the literary course and graduated in 1891 with the degree of Ph. B. He was a member of Delta Kappa Epsilon.

After leaving Cornell, he went to Western Reserve as a medical student and

Worth looking into

IT'S the most interesting study in the world.
What is? Why you, yourself.

Put yourself under the microscope. Examine yourself most searchingly to find out just what kind of work you have a natural aptitude for.

Don't leave your career to chance. Don't be satisfied with any nonchalant observation of what may seem to be your best field.

Upperclassmen who have applied this careful self-study will tell you it helped them pick out the "major" which fell in most closely with their natural fitness. The result—greater interest and greater profit through their whole college course.

Graduates will tell you that the man who turns the microscope on himself is happiest in his choice of a life-work.

It comes down to this—some patient analysis now may be the means of putting you on the right track for the rest of your life.

This advertisement is one of a series in student publications. It may remind alumni of their opportunity to help the undergraduate, by suggestion and advice, to get more out of his four years.

graduated in 1894 with the degree of M. D. After eighteen months of work as an interne in a Cleveland hospital, he spent about a year in research in Vienna.

On his return to Fremont, he began the practice of his profession and became widely known. When the War came on, he enlisted in the Medical Corps and served at several camps and forts. At the cessation of hostilities he was retained by the Government for special work in the Veterans' Bureau and had been stationed at various places. The week before he died, he was transferred to St. Paul and Minneapolis.

He was married in 1897 to Miss Marguerite Dickinson, who survives him with one son, Merton O. Phillips, Jr., of Akron, Ohio, a daughter, Jane C. Phillips, who is attending Mt. Holyoke, and his mother.

Dr. Henry P. Merrill '00

Word has just been received of the death in Brooklyn, N. Y., on September 25, 1923 of Dr. Henry Putnam Merrill, Jr.

He was born in Portland, Me., on May 14, 1875, the son of Mr. and Mrs. Henry P. Merrill, and secured his early education there. After attending the Maine Medical College he entered the Cornell Medical College in 1898 and graduated with the degree of M. D. in 1900.

Carleton F. Miller '13

Belated news has been received of the death on November 3, 1921, at Newark, Del., of Carleton Friend Miller.

He was born on June 13, 1888 at Wallingford, Conn., the son of Mr. and Mrs. Charles H. Miller. He obtained his early training in that city, then went to Wesleyan, whence he came to Cornell in 1909. He remained as a student for two years, was away one year, then returned and in 1914 received the degree of Ph. D.

Paul R. Foote '15

Paul Richard Foote died suddenly of infantile paralysis at Providence, R. I., on September 1.

He was born February 27, 1891, at Auburn, N. Y., the son of Mr. and Mrs. Willis S. Foote, and secured his early education in that city. After attending Mercersburg Academy for a time, he came to Cornell in 1911 and remained for one year. For the past nine years he had been engaged in the automobile business in Auburn.

In addition to his parents, he is survived by his wife, Mrs. Evelyn Clark Foote, and two small children, besides two sisters, Mrs. Frederick Knox of Auburn, and Mrs. Robert Palmer of Buffalo, N. Y. and one brother, Burt Foote of Auburn.

Ambrose M. Burroughs '19

Ambrose Matson Burroughs was killed in an automobile accident on September 10.

He was born on May 12, 1898 at Albion, N. Y., the son of Mr. and Mrs. C. H. Burroughs. He secured his early training there and after graduating from the Albion High School, came to Cornell in 1915 as a student in the College of Agri-

culture. He remained for three years, then left for one year. In 1920 he graduated with the degree of B. S. and in 1922 earned the degree of M. S. He was a member of Alpha Zeta.

FACULTY NOTES

PROFESSOR JAMES E. BOYLE told the Grain Dealers' National Association in session in Cincinnati on September 24 that pooling of wheat is an "economic fallacy and can succeed only on a rising market."

PROFESSOR BRISTOW ADAMS spoke at the annual conference of New Jersey newspaper men held at New Brunswick on September 29. Describing "French Newspapers as Seen by an American," he related observations made during a vacation trip through France, Belgium, and England this summer.

DEAN GEORGE G. BOGERT '06 in July was elected, for his third term, secretary of the Conference on Uniform State Legislation of the American Bar Association. Irving F. K. Butler '26 of Poquonoch, Connecticut, was appointed assistant secretary to help Dean Bogert with the work of the office.

PROFESSOR ROBERT S. STEVENS is the author of a uniform incorporation law which was favorably received by the Conference and referred to a committee for consideration next year.

DR. G. B. L. SMITH, Heckscher research assistant, goes this year to St. John's College, Annapolis, as assistant professor of chemistry.

DEAN GEORGE G. BOGERT '06 of the College of Law has returned to Ithaca after a sabbatical leave spent in practice in New York, particularly dealing with trusts and wills. Professor Charles K. Burdick, acting dean last year, has this summer visited Geneva and attended sessions of the assembly of the League of Nations.

PHYSICS DEPARTMENT MIGRATES

Since the completion of the Baker Laboratory of Chemistry, Reservoir Avenue has been straightened so that it now intercepts East Avenue further north than before. It has been moved from the south to the north side of a shade tree that, according to Emeritus Professor George S. Moler '75, is responsible for an architectural irregularity in the Physics Laboratory.

When the permanent site of Rockefeller Hall was finally decided upon, some twenty years ago, it was found that there would not be space for Reservoir Avenue to pass between the corner of the dynamo laboratory and this particular tree. The tree was a fixture, and so there was nothing to do but set the dynamo wing ten feet in from the side of the main structure.

Professor Moler says that in its early days the Physics Department was about

the most migatory thing around the University. When fairly ensconced in one home, it either became restless or was ousted, and had to seek new quarters. Even when John D. Rockefeller came to the rescue, years were spent in deciding on a site for his donation; and at least nine different plans were considered for it. In the meantime, Mr. Rockefeller's gift had been advanced and interest was accruing rapidly, so there was gain even in delay.

Here are some of the places where the Physics Department hung up its hat in olden days: Morrill Hall, the old wooden Chemistry Laboratory which stood on the Quadrangle; McGraw Hall, Franklin Hall, and a piece of West Sibley. Two quarters, which were seriously planned but never acted upon, were the dining room in Cascadilla Hall, and a connecting structure projected between McGraw and Morrill.

It was when the Department outgrew its location in Franklin Hall that the donation for the present large laboratory was made. The first site considered was that upon which the south wing of Goldwin Smith now stands; it was abandoned because funds were not sufficient.

A second plan was to place the Physics Building on the slope in the angle between White Hall and Morse Hall, west of McGraw. Another which was contemplated was within the Quadrangle, on the east side of and facing the road which then intersected the Campus; the site was opposite White Hall, and an east wing was planned to connect by an arch with the old Dairy Building, now the north wing of Goldwin Smith. This proceeding would have put Sibley literally in the "back yard," and shortened the Quadrangle to a great extent. The rooms and laboratories were fully planned by the Physics Department before this plan was abandoned.

The plan which finally led up to the present site was to build the Physics Laboratory around the old Dairy Building, and at the same time placing Goldwin Smith Hall, which was now being actively planned, on the slope to the east. Neither the College of Arts and Sciences nor the Physics group was quite satisfied with this, and determined to please both parties by exchanging their sites.

With a whole strip of hillside to choose from, the Physics Department gathered in a body on the field and spent some time in deciding just where their long-awaited building was to be. At last there was agreement, and the cornerstone was laid in 1904. Two years later, after such minor delays as a tree getting in the way, the Department moved in.

THE DRAMATIC CLUB has chosen its first group of three plays to be presented. Two of them, "Black Demon" and "The Storm," are tentatively scheduled for October 17 and 18; permission to play the third is being asked from Paris.

**THE STURGEON POOL DEVELOPMENT FOR THE UNITED HUDSON ELECTRIC CORPORATION
THE FOUNDATION COMPANY, GENERAL CONTRACTOR**

THIS development of the United Hudson Electric Corporation, near Kingston, N. Y., utilizes water power from Wallkill Creek. The dam is about 700 feet long and 110 feet high. The power house is about 50 feet by 100 feet, and the present installation will consist of three vertical wheels, each with a 6000 H. P. generator. Construction involved the operation of a quarry, crushing plant, and a railway from the quarry. Materials, other than stone, had to be trucked in, but in spite of this handicap and a severe winter, construction was carried on by The Foundation Company, as general contractor, without interruption.

THE economy of "white coal" is now so fully realized that hydro-electric developments are being built wherever there is a demand for cheap electric energy. With modern equipment and an efficient organization, The Foundation Company is building hydro and steam power projects in many parts of the world.

BUILDERS OF SUPERSTRUCTURES AS WELL AS SUBSTRUCTURES

ALUMNI NOTES

'87 ME—In a recent interview with the representative of a marine paper in New York, Captain Charles A. McAllister, editor of the American Bureau of Shipping *Bulletin* gave an interesting account of his first view of a college professor, obtained when he came to Cornell in 1883 as an engineering student. "I had never seen a real university professor and when I arrived I asked to have one pointed out to me. I was directed to a large window, and looking through, saw a dignified gentleman leaning over a drawing board. Just as I craned my neck and gasped at the sight of my first professor, the gentleman at the drawing board spilled some ink or something and let out a yell. I ran for my life and hid under the bed in my dormitory. I had caught my first glimpse of Captain Walter M. McFarland, who was to be my instructor in marine engineering and has been my close friend for many years."

'91 ME—Manning, Maxwell and Moore have announced that Augustus Wood has been appointed works manager of the Putnam Machine Company at Fitchburg, Mass.

'96 PhB, '98 LLB—James S. Truman of Owego, N. Y., has been named as the Republican candidate for State senator from the 37th District of New York State, to fill the vacancy created when Senator Seymour Lowman, who had previously been nominated, was named as the candidate for the lieutenant-governorship. Truman was at one time president of the First National Bank in Owego, and is now serving as chairman of the Tioga County Board of Supervisors.

'99 MD—In the August 24 issue of the *New York Tribune*, considerable space was devoted to a description of some houses recently erected at Port Washington, N. Y., by Dr. Charles V. Paterno. The homes are declared to be models for arrangement, convenience and comfort and the writer declared her belief that Cornell should have given Dr. Paterno the degree of H. D. (House Doctor) instead of the degree in medicine.

'01 ME—Arthur O. Berry is serving in an advisory capacity with the Chattanooga, Tenn., Coke and Gas Company. His duties include discussion with would-be purchasers of coke, of the best methods of firing and the proper kind of equipment to use in securing the best heating and firing benefits from the product. For eight years he was with the valuation division of the Interstate Commerce Commission at Chattanooga. He is a member of the American Society of Mechanical Engineers.

'02 AB, '05 PhD—An announcement has just been made that Dr. William C. Geer, vice-president in charge of research work with the B. F. Goodrich Rub-

ber Company, will sever his official connection with the firm in 1925. He is planning to spend the next few years in travel and study along lines stimulated by his long connection with the scientific features of the rubber industry. During the War, Dr. Geer was frequently mentioned as "the father of the gas mask," for his study helped to develop the masks to safety and efficiency. He is also widely known as an authority on rubber chemistry.

'04 ME—John F. Borden is an experimental engineer with the Oliver Continuous Filter Company in the Cunard Building, San Francisco, Calif. He is the inventor of the Oliver-Borden thickener now being installed in the Rocky Ford, Colo., and Grand Island, Neb., plants of the American Beet Sugar Company.

'06 AB—Charles H. Tuck was one of the speakers at the recent annual convention of Delta Upsilon held at Syracuse, New York.

'07 AB, '08 AM—Kathryn B. Kyser is teaching English and Spanish this year in the High School at Huntington, Long Island.

'08 ME—Charles L. Beaman is representing the Connecticut Mutual Life Insurance Company in Detroit, Mich. His address is 942 Blaine Avenue.

'08 ME—Harry P. Reiber is with the Oil Well Supply Company of Pittsburgh, Pa., and is located at its Twenty-first Street works.

'08 BSA—Vaughan MacCaughey was recently chosen as regional director of education for Region Twelve, Boy Scouts of America. The position is a new one for the organization and in his work, MacCaughey will have charge of training courses and educational programs, especially in cooperation with colleges, universities, normal schools, and rural institutions throughout the region, which comprises the States of Nevada, California, Arizona and Utah. MacCaughey is a member of the National Council of the Scouts and a special field commissioner for the California Scouts. His address is the Phelan Building, San Francisco.

'13 ME—Word comes from Cleveland, Ohio, that John Paul Jones, former varsity miler and record holder, has moved to that city and is located at 13, 817 Clifton Boulevard, Lakewood, Cleveland.

'14 BS—Lawrence J. Benson has bought out G. F. Myers and Company, a retail and wholesale coal firm at North Tonawanda, N. Y., and is conducting the business under the name of The Myers Coal Company. He is located at 165 Goundry Street and says that he has the largest coal trestle in that part of the State, with the exception of those in Buffalo and Niagara Falls.

'15 CE—Alan F. Williams has returned to this country after being in France

during the summer with the American Olympic Team. He played on the Rugby team which won the Olympic championship, after a series of elimination contests which brought the Americans into the finals with the French team as opponents. His address now is P. O. Box 144, Sausalito, Calif.

'15 BS—William Creifelds, Jr., who has been with the New York State Fire Insurance Company as its assistant secretary at Albany, N. Y., is now with Crum and Forster, general agents, at 110 William Street, New York. He is living at 46 Seventy-sixth Street, Brooklyn.

'16 ME—Walter Sturrock is still in the engineering department of the National Lamp Works at Nela Park, Cleveland, O.

'17 ME—Robert W. Hendee was married at East Orange, N. J., on September 18 to Miss Elinor Lindsley, daughter of Mr. and Mrs. Charles A. Lindsley. The ceremony took place in the First Presbyterian Church of which the bride's ancestor, Rev. Daniel Taylor, was minister two hundred years ago. Harolde N. Searles '17 was best man, and Eldridge D. Lindsley '17 was one of the ushers. They will reside in Tulsa, Okla., where Hendee is maintenance superintendent of the Oklahoma Natural Gas Company, secretary of the Petroleum Congress and secretary of the Mid-Continent section of the American Society of Mechanical Engineers.

'17 BS—Mr. and Mrs. Louis A. Lamoreux have a daughter, Alice, born on September 13. They are living in Mansfield, Ohio, where he is an architect with offices at 120 Mohican Building. Lamoreux says Alice will register with Davy about 1942.

'17 BS—William A. Hoffman is an entomologist with a survey which is being made by the International Health Board in the Republic of Haiti. He can be reached through the sanitary engineer of Haiti at Port au Prince. He writes that Dr. George C. Payne '12 is a State director with the International Health Board, in charge of the work in Haiti, while Dr. Paul F. Russell '21 is an associate State director, located at the malaria station at Leesburg, Ga.

'17 BChem—Paul F. Stricker is a director of the Baltimore, Md., Safety Council. His office is at 120 Light Street.

'17 AB; '19 BArch—Mr. and Mrs. Frank D. Boynton, Jr., (Margaret H. Palmer '19) have bought a home at 1725 Seyburn Avenue, Detroit, Mich., where Boynton has organized the National Savings Association which is located on the ground floor of the Dime Bank Building.

'18 DVM—Dr. Albert J. Tarr was married in Geneva, N. Y., on August 15, to Miss Nellie R. Scofield, daughter of Mr. and Mrs. Charles M. Scofield. They went on a honeymoon trip through the East but are now at home at 136 North Main Street.

'18, '19 AB—Walter L. ("Doc") Quinlan is now director of all recreation activities for children and adults in Tampa, Fla., where his headquarters are the City Hall. He says that he is interested in building a strong Cornell Association in Florida because "it is the winter playground of all North America east of the Mississippi, and if we have an active organization, we shall keep Cornell before the wealthy tourists and then, who knows, one of the visitors might decide to contribute a million or two to the University."

'19 AB—Mrs. D. L. Ingard of Santa Rosa Ranch, Fruitland, Calif., has announced the engagement of her daughter, Jane G. Carroll '19, to C. E. Murphy, son of Mr. and Mrs. J. P. Murphy of Cleveland, Ohio. Miss Carroll's address is 12479 Cedar Road, Cleveland.

'19, '20 BS—Norman T. Newton, who is studying at the American Academy, Porta San Pancrazio, Rome, Italy, recently returned from a three-months' trip through northern Italy. While in Milan he writes that he saw Robert W. Steel '21. He says that Steel had just signed a contract for 1925-6 with the Chicago Opera Company and has several engagements already for the coming year in Italy. He adds that he also met recently Edwin L. Howard '19, "Budge" Bailey '19, "Winks" Voight '21, "Red" Ewald '22, and Dodd McHugh '25. He expected soon to see Professor Edward G. Lawson '13, who was slated to come through with a party of landscape architecture students.

'22 BS—After spending the summer as a counselor in the Buffalo Girl Scout Camp located in the Alleghany State Park, Cornelia S. Walker has taken the position of home demonstration agent for Madison County, N. Y. She is living in Oneida at 426 Broad Street.

'22 AB—Alanson W. Willcox has begun his second year in the Harvard Law School, which he describes as "an institution where they have a deep sense of the meaning of the word 'work'". His address is Winthrop Hall, Brattle Street, Cambridge.

'22 ME—David S. Ramirez is mechanical engineer in charge of the Government shops at San Juan, Porto Rico. He can be reached in care of the Y. M. C. A.

'22 CE—Burnett Bear is still with the McClintic-Marshall Construction Company of Pittsburgh. He has nine months more of work ahead of him before he finishes an apprentice course of two and one-half years. His present work is on the 23,000-ton Castleton bridge over the Hudson River for the New York Central Railroad. His address is 527 North Avenue, Wilkinsburg, Pa.

Declaration of Independence

A facsimile copy of the Declaration of Independence has been issued by the John Hancock Mutual Life Insurance Company.

This reproduction is a composite reduced facsimile, one-quarter size, taken from a facsimile reproduction of the original Declaration of Independence made by W. I. Stone in 1823, under the direction of John Quincy Adams, then Secretary of State. The original engrossed Declaration is in the custody of the Librarian of Congress at Washington. The John Hancock Company will send this copy of the Declaration free for framing.

Over Sixty Years in Business. Now insuring Nearly Two Billion dollars in policies on 3,500,000 lives.

John Hancock
LIFE INSURANCE COMPANY
OF BOSTON, MASSACHUSETTS

The Agricultural Booklist is Yours for the Asking

IT will interest others than farmers. The first section on miscellaneous books is of special interest to farmers; but later in the booklet are sections on Home Economics, Forestry, Nature Study, and the closely allied subjects: Horticultural, Veterinary, Poultry, Dairying and Farm Animals. We try to keep this booklet up-to-date so that it may be reliable.

Have You the Cornell Songbook?

While some cannot read music, at least you can learn the Cornell Songs more accurately if the song is played correctly on the piano for you. The songbook sells at \$1.95, postage paid. The binding is red cloth printed in black.

Ask for a Copy of the Engineering Booklist

The present edition covers the classifications of Physics, Mathematics, Geology, Chemistry, and Architecture as well as the better known Engineering books. We will gladly obtain for you suggestions as to special books in your line. It is all included in our idea of service.
